Unique microclimate

Surrounded by the green and peaceful Spa Park with a brine graduation tower and a unique health resort microclimate, EVA Park Life & SPA offers the perfect conditions for a deep rest and relaxation. It is ideal for recreation combined with beauty and regenerative treatments.

The restorative power of the brine

When creating our rich and varied offer of SPA treatments, we draw on the natural wealth of the spa town of Konstancin-Jeziorna. The brine extracted from our own spring feeds the brine pool, which is a perfect starting point for further beauty treatments. Our Guests can also enjoy an antiseptic and refreshing brine pearl bath in the hot tub, or an aromatic scrub with iodine-bromine salt.

Professional health & beauty and wellness treatments

EVA Park Life & SPA offers a wide range of various balneo-therapy treatments, using the healing power of brine and latest advances in cosmetology. From moisturizing and firming treatments and procedures for lifting and improving the oval face to programs eliminating signs of fatigue, vascular problems or acne. High quality, top-of-the-range equipment will help you sculpt your body or reduce cellulite. Our qualified staff will help you choose an ideal program tailored to individual skin needs.

Relaxing massages

Massages and body care rituals are a perfect way to relieve stress or pain, even persistent. Depending on the needs of our Guests, we offer various treatments to help relax sore muscles. Our body rituals improve circulation and increase metabolism, as well as provide blissful relaxation and care with the use of natural aromatherapy oils.

Maximus

Maximus combines two powerful technologies: tripolar radiofrequency and innovative dynamic muscle activation. The treatment reduces fat tissue and tightens collagen fibres in the dermal layer, resulting in denser and visibly firmer skin. Additionally, the increased temperature stimulates fibroblast activity to produce new collagen.

Lymphatic drainage in a suit

This is an alternative to lymphatic massage for the lower parts of the body. It eliminates the feeling of heavy legs and swelling. The suit gradually fills with air from the feet towards the abdomen, causing gradual compression of different parts of the body. It stimulates lymph flow, ensuring that the tissues are supplied with oxygen and nutrients.
